

Hallelujah

Revelation 19:6

Halleluiah for the lord our God the Almighty reigns

'Hallelujah' is composed of two elements...HALLELU which mean 'Praise' and JAH is the shortened name of the creator "Yahweh". It means "Praise Yahweh".

"Hallelujah" is the only word which has never been translated into other languages. Its pronounced in the same way in every language.

"Halleluiah" is used to express praise, joy and thanks. We often see this word in songs and praise and worship. Whenever our heart is thrilled / overwhelmed and excited we thank GOD saying Hallelujah.

But the most important thing that we should keep in our mind is to say "Hallelujah" even in the midst of trials and pain. Trusting HIM and saying "Hallelujah" for putting us in such situations when we are at our lowest and HE seems very far away from us.

Never forget.... nothing happens without HIS knowledge and HE puts us into test so that we realise that HE is still at work.

For a second just think, if we lose our appetite or hunger or desire for things in life, everything will come to an end. What is the point of having best of the best things in life and you don't have the feeling to enjoy it?

Praise God at every moment for fulfilling our desires and wants. It's very easy to say "what worst can happen other than death" but when death knocks your door, you realise how precious is your life. Desire to live increases when, the Dr says that the days are numbered. Try visiting the person, who is suffering, every month, to know how wonderful is HIS care and important are we in HIS eyes.

Friends do not take anything for GRANTED. Our life is precious, every organ of our body is precious, every second is precious.... keep a check and make all Gift of GOD (GOG) worthy to be utilised for HIS name.

Hallelujah...

Shalom to all!
